PROFESSIONAL SUMMARY

An analytical and detail-oriented Applied Mathematics graduate specializing in Data Science, with a proven track record in end-to-end data analytics, machine learning pipeline deployment, and full-stack development. Proficient in Python, SQL, R, and advanced business intelligence tools, with hands-on experience architecting auditing systems and forecasting models. A strategic former executive leader adept at managing cross-functional technical teams, directing data-driven organizational policies, and translating complex datasets into actionable business insights.

EDUCATION

Far Eastern University- Manila
B.S. Applied Mathematics (Data Science Track)
Aug 2022–Present
Dean's Lister, 2nd Semester S.Y. 2024-2025
Dean's Lister, 1st Semester S.Y. 2025-2026

Manila Tytana Colleges
Academic Track (S.T.E.M. Strand)
Aug 2020–July 2022
With High Honors, S.Y. 2021-2022

EXTRACURRICULAR ACTIVITIES

Vice President

FEU Mathematics Society (FEU MathSoc)

May 2025-May 2026

- Directed organizational governance by managing the creation and review of official memorandums, partnership agreements, and policy documents.
- Conceptualized and launched "Solving Y", a bi-semesteral focus group initiative designed to address student grievances.
- Led parliamentary participation within the IAS Parliament to advocate for student grievances.

Associate Director

FEU College Y Club (FEU CYC) Membership Department

June 2025-May 2026

- Streamlined internal communication channels and group announcements to broadcast updates and cultivate member engagement.
- Maintained membership database integrity to ensure data privacy and accuracy of organizational records.

Associate Director for Research and Communications

IAS Student Council (IAS SC) Marketing and Content Department

June 2025-May 2026

- Formulated data-informed social media strategies and analyzed performance metrics to optimize content and maximize platform engagement.
- Collaborated on scriptwriting and narrative creation for online publications and digital campaigns.
- Directed cross-departmental creative alignment between departments of the student council.

Executive Committee

FEU Central Student Organization (FEU CSO) Data Analytics Department

September 2023-May 2026

- Generated data-driven reports and policy proposals by modeling gathered complex university data.
- Automated evaluation pipelines in Excel to streamline semesteral performance tracking.

Press Relations Officer

FEU Mathematics Society (FEU MathSoc)

May 2024-May 2025

- Directed multi-channel information dissemination across digital and physical platforms to enhance organizational visibility and audience reach.
- Supervised creative outputs to ensure branding compliance and consistency across all publications.
- Led the strategic relaunch of the official Merchandise Collection from initial creative design to final campaign release

Writer

IAS Paragon

September 2023-May 2025

- Authored news features and editorial articles covering campus milestones and socio-political issues.
- Collaborated with other writers to verify fact accuracy, refine narrative clarity, and maintain strict journalism guidelines.
- Supported the Photojournalism Department by capturing visual media to complement write-ups.

PROJECTS

Project Manager and Full-Stack Developer

SMARTech: Social Media Auditing and Reporting Technology

September 2025-May 2026

- Deployed an AI-assisted auditing system for the National Youth Commission featuring a Caption Verifier driven by fine-tuned DeBERTa-v3 and T5 pipelines alongside a PubMat Checker using a custom YOLOv26 model, utilizing GitHub to store the React front-end, Python to develop the backend hosted on Hugging Face, and Supabase for the database.

Project Manager and Co-Author

Machine Learning Models for Synthesizing and Forecasting the Electricity Outage Risk Index using Time-Series Data

November 2025-December 2025

- Co-developed a predictive machine learning study establishing a two-stage cascading architecture that utilizes LARS and LASSO regressions to model power grid risks from climate time-series data, bypassing proprietary data scarcity by pioneering a synthesized 1–100 Electricity Outage Risk Index proxy.

Project Manager and Co-Author
A Simulation and Calibration of the Solow-Swan
Neo-Classical Growth Model

October 2025-December 2025

- Co-authored a macroeconomic study calibrated to the Philippine economic trajectory by implementing Ordinary Least Squares baseline estimations and steady-state calibrations of an augmented Solow-Swan growth model featuring different economic classifiers modeled in Python.

Front-End Developer
GrowTogether: A Collaborative Productivity Application

November 2025-December 2025

- Co-developed a collaborative, serverless mobile productivity application utilizing Flutter and AWS that gamifies focus habits via a shared virtual forest, custom data visualizations, and a botany-themed milestone reward matrix.

Data Analyst
Business Intelligence Project for Spotify

September 2024-December 2024

- Engineered an end-to-end business intelligence solution utilizing Spotify Charts data to model and visualize artist performance and streaming trends through dashboards developed in Tableau that transform raw datasets into business insights.

SKILLS

- **Technical:** Python, R, SQL, C++, Data Visualization, Machine Learning, Statistical Modeling, Data Mining & Wrangling, Database Management, Time Series Analysis & Forecasting, Econometric Modeling, Multivariate Analysis, Mathematical Modeling, Operations Research, Full-Stack & Front-End Development, LaTeX, Cloud Computing, Data Warehousing
- **Soft:** Analytical & Critical Thinking, Executive Leadership, Cross-Departmental Alignment, Data Storytelling & Technical Writing, Strategic Communication, Project Management, Client Relations, Problem-Solving, Time Management, Adaptability, Collaboration, Creativity

Front-End Developer and Data Validation Lead
SignSense: A Filipino Sign Language Detector

September 2024-December 2024

- Co-developed a real-time computer vision prototype using Python, TensorFlow, Keras, and OpenCV designed to accurately detect and classify the Filipino Sign Language alphabet through an accessible user interface, trained and verified on validated image datasets.

Project Manager and Back-End Developer
HashBlog: A Modern Blogging Platform

September 2024-December 2024

- Co-developed a blogging platform centered on hashtag-based content linkage, utilizing an SQL-backed data warehouse with custom relational schemas, optimized query architectures, and dynamic data relationships to handle user and post records.

Front-End Developer
Kristine's Beauty Salon Website

February 2024-May 2024

- Programmed a dynamic salon web application featuring an online service booking system and an automated email notification pipeline implemented through PHP backend scripting, supported by a fully responsive digital catalog and a user interface.

TOOLS & PLATFORMS

- Jupyter Notebook, GitHub, Google Colab, RStudio, MySQL, DBeaver, phpMyAdmin, Tableau Public, Power BI, Supabase, KNIME, AWS, Vercel, Hugging Face, Flutter, OpenCV, TensorFlow, Keras, Notion, Canva, Adobe Lightroom, Windows, Google Workspace, Microsoft Office 365
